

ZIYAD JABER ALHDRITI

Makkah, Saudi Arabia | ziyadalhdriti@gmail.com | linkedin.com/in/ziyad-alhdriti | github.com/ziyadalhd

SUMMARY

Software Engineering student at Umm Al-Qura University (GPA 3.73/4.00, expected 2027) with hands-on experience building full-stack mobile applications using Flutter, Dart, and Spring Boot. Comfortable integrating RESTful APIs, modeling data in PostgreSQL, and collaborating in Agile/Scrum teams. A self-directed learner who independently picked up Swift to build an iOS prototype, with a solid foundation in software engineering principles and practical, end-to-end development.

EDUCATION

Umm Al-Qura University — B.S. in Software Engineering

Makkah, Saudi Arabia

Expected Graduation: 2027 | GPA: 3.73 / 4.00

Relevant Coursework: Operating Systems, Software Construction, Software Testing, Software Design, Object-Oriented Programming, Data Structures, Databases, Linear Algebra & Differential Equations.

PROJECTS

Wasl — Student Transportation & Accommodation Platform

Graduation Project, 2025–2026

Flutter, Dart, Spring Boot, Java, REST APIs, PostgreSQL, Git, Agile/Scrum

- Developed cross-platform mobile screens in Flutter from system design and SRS documentation, supporting three user roles (Student, Provider, Admin).
- Integrated the Flutter front-end with Spring Boot RESTful APIs to handle data exchange, user flows, and service operations.
- Built booking and service-request workflows connecting students with transportation and accommodation providers.
- Collaborated within a Scrum team using sprint-based development, Git version control, and PostgreSQL through the API layer.

Daily Water Intake Tracker — iOS App

Personal Learning Project, 2026

Swift, Xcode, Local Data Persistence, AI-Assisted Development

- Self-taught Swift from scratch to build a working iOS prototype that calculates and tracks daily water-intake goals.
- Implemented core application logic and user-interface components using native iOS development patterns.
- Added local data storage to persist user entries across sessions.
- Applied AI-assisted development and rapid-prototyping techniques to accelerate self-learning and shorten iteration cycles.

TECHNICAL SKILLS

Languages:	Java, Dart, Swift, SQL
Mobile Dev:	Flutter, Dart, native iOS (Swift), UI implementation, local data persistence
Backend & APIs:	Spring Boot, RESTful API integration, Firebase
Databases:	PostgreSQL, SQL
Tools & Practices:	Git, GitHub, Agile/Scrum, OOP, SDLC, rapid prototyping, AI-assisted development

VOLUNTEERING

Community Volunteer — National Volunteering Platform (Saudi Arabia)

2024–Present

- Completed 262+ verified volunteering hours across multiple community initiatives.
- Supported event organization, coordination, and operational tasks.
