نبذة عنا

Software Engineering student with a strong focus on Flutter development and mobile applications. I enjoy building cross-platform apps that combine clean architecture with thoughtful user experience. I'm particularly interested in applying structured software engineering practices throughout the development process, from requirements to implementation and testing, while continuously improving my technical skills.

SUMMARY

Software Engineering student at Umm Al-Qura University with a strong academic record (GPA 3.73/4.00). Interested in mobile application development and full-stack systems. Experienced in building real-world applications using Flutter and Spring Boot. Passionate about learning new technologies quickly and applying software engineering principles to develop scalable and practical solutions.

EDUCATION

Umm Al-Qura University
B.S. in Software Engineering GPA: 3.73 / 4.00
Expected Graduation: 2027
Makkah, Saudi Arabia

PROJECTS

Wael – Integrated Student Transportation & Accommodation Platform
Graduation Project — 2025

- Designed a scalable multi-role system handling bookings, payments, and service management workflows.
- Modeled relational database schema and implemented structured data management using SQL.
- Developed RESTful APIs and integrated them with Flutter-based mobile application.
- Applied Agile methodology with sprint planning and iterative delivery.

iOS Mobile Application – Swift
Personal Project — 2026

- Independently developed and deployed an iOS application using Swift despite no prior experience in the language.
- Implemented mobile application screens using Flutter based on system design and SRS documentation.
- Integrated Flutter front-end with backend RESTful APIs.
- Contributed to database integration and feature implementation using PostgreSQL.

SKILLS

Programming Languages: Java, Dart
Frameworks & Tools: Flutter, Spring Boot, Git, GitHub
Concepts: Object-Oriented Programming (OOP), REST APIs, Software Development Life Cycle (SDLC)
Database: SQL

VOLUNTEERING

Community Volunteer
National Volunteering Platform (Saudi Arabia)
2024 – Present
Saudi Arabia

- Completed over 262 verified volunteering hours across multiple initiatives.
- Participated in community service and event organization activities.
- Contributed to coordination and operational support tasks.

تم بحمد الله إتمام مشروع تخرج (1)، وكانت تجربة ثرية بالتعلم والتحديات، خاصة في العمل الجماعي وتحويل الأفكار إلى حل قابل للتنفيذ. (WASL) ضمن فريق وصل (UI/UX Designer) سعيد إنها كانت أول تجربة لي كمصمم واجهات، وفرصة لتطبيق ما تعلمته بشكل عملي.

يهدف المشروع إلى تقديم نظام ينظم عملية المواصلات والسكن لطلاب الجامعة مما يساهم في تسهيل رحلتهم الجامعية

على دعمه وتوجيهه المستمر وملاحظاته التي **Ahmed Alharthi** كل الشكر لمشرفنا د. أحمد الحارثي كان لها أثر كبير في تحسين العمل

وكان لي الشرف أن أكون قائد الفريق خلال هذه التجربة. كل الشكر لأعضاء الفريق

عبدالله السالم

Moath Bugis

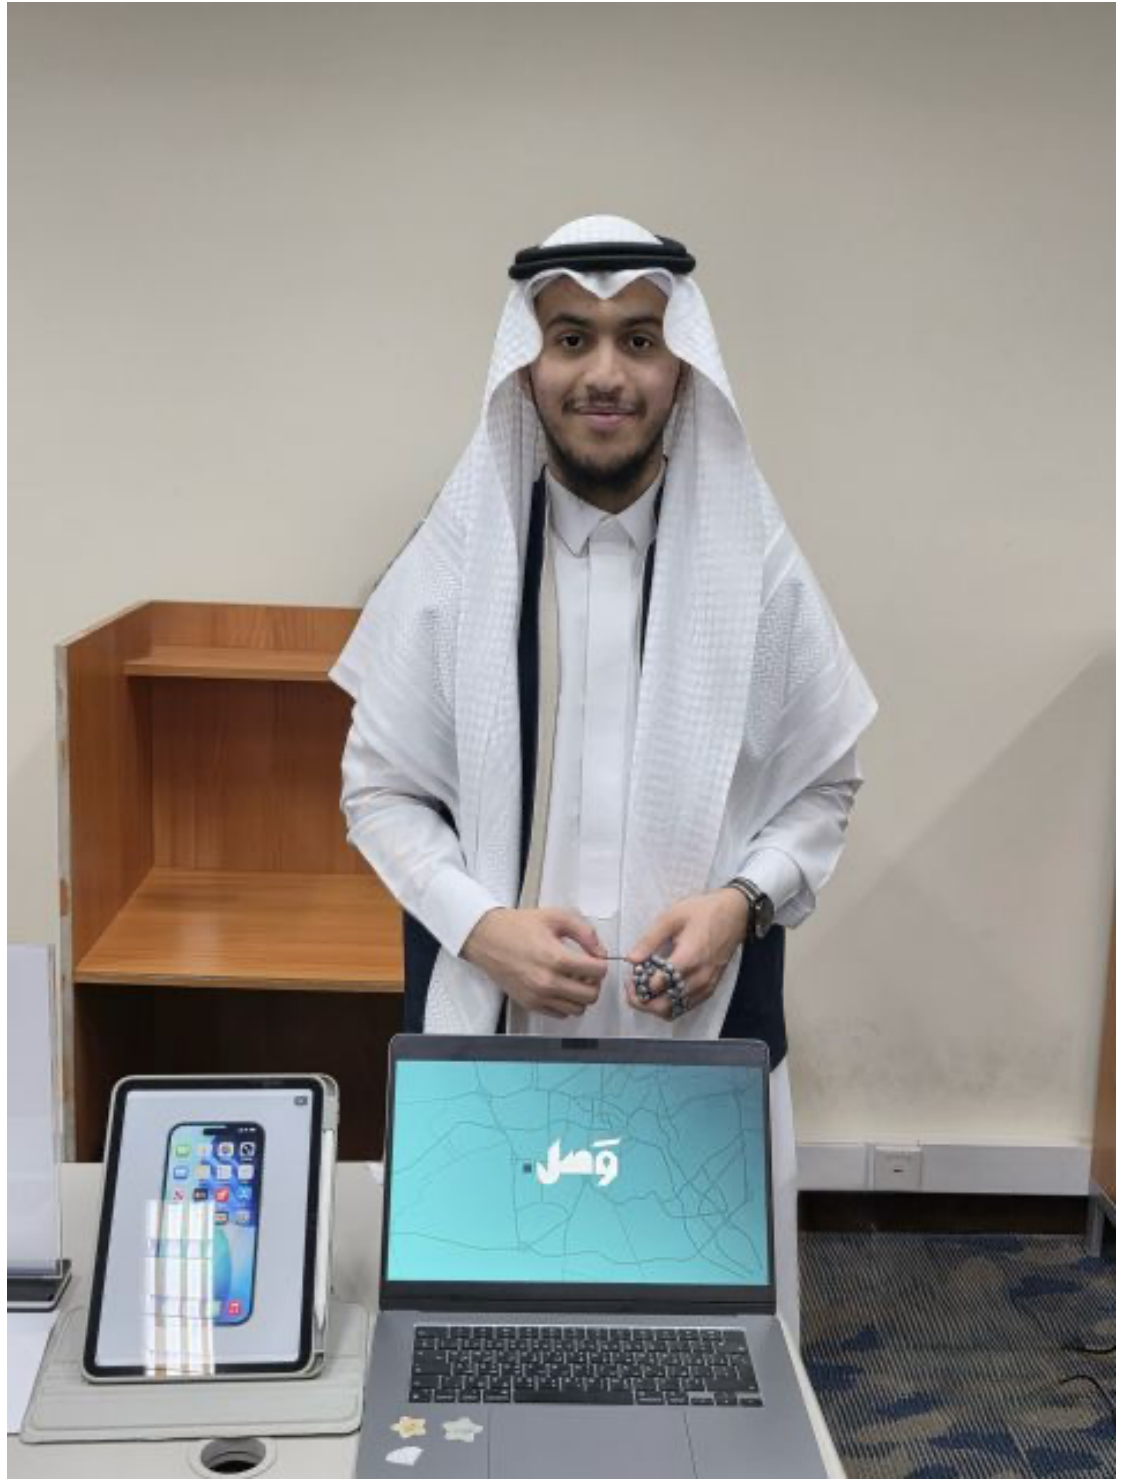

Saud Aldahasi

Ziyad Alhdriti

على تعاونهم والتزامهم، فنجاح المشروع كان نتيجة جهد جماعي وتكامل بين الجميع.

القادم بإذن الله أفضل، وكلنا شغف لإتمام كامل المشروع 🚀

التعليم

Umm Al-Qura University
Bachelor's Degree .Software Engineering
٢٠٢٣ - ٢٠٢٧

Participated in team-based software development projects following Agile methodology

During my studies in Software Engineering, I've built a solid foundation in software design and development principles. I studied object-oriented programming, data structures, database systems, software requirements engineering, UML modeling, and software testing. I also gained practical experience in mobile application development and system integration through academic projects, including working on a full platform project as part of my coursework. The program helped me understand how to move from requirements and analysis to actual implementation and testing in a structured way.... المزيد

Python 101
منصة سطر
تاريخ الإصدار فبراير ٢٠٢٣

Python

Python 101 (Satr)

Introductory Python course focused on programming basics and problem-solving skills.

Flutter Application Development Bootcamp
Hash Plus

تاريخ الإصدار يوليو ٢٠٢٥

بالإضافة إلى ٣ مهارات Dart وFlutter

Flutter Application Development Bootcamp – Certificate

Completed a 30-hour hands-on Flutter development bootcamp. Built two functional mobile applications and practiced UI implementation, state management, and API integration. Strengthened my understanding of structured mobile development and clean coding practices.

المشروعات

WASL – Integrated Student Transportation & Accommodation Platform

يوليو ٢٠٢٥ – حاليًا

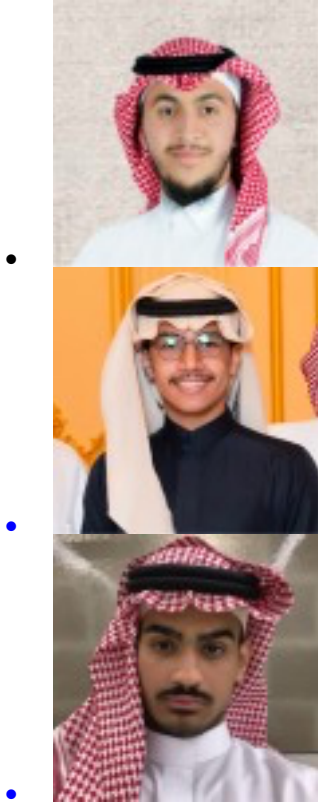

Umm Al-Qura University مرتبط بـ

WASL is a full-scale mobile application developed to solve transportation and accommodation challenges for university students. The project was developed following structured Software Engineering practices, starting from requirements analysis and SRS documentation, through system design (UML, DFD, ER diagrams), and ending with implementation, integration, and testing. The platform integrates transportation (buses, private, volunteer drivers) and student accommodation services into a unified system with booking, payment, rating, notification, and admin management features. Developed using Flutter for the mobile application and Spring Boot for backend services, following Agile methodology.... المزيد

SUMMARY

Software Engineering student at Umm Al-Qura University with a strong academic record (GPA 3.73/4.00). Interested in mobile application development and full-stack systems. Experienced in building real-world applications using Flutter and Spring Boot. Passionate about learning new technologies quickly and applying software engineering principles to develop scalable and practical solutions.

EDUCATION

Umm Al-Qura University
B.S. in Software Engineering GPA: 3.73 / 4.00

Expected Graduation: 2027
Makkah, Saudi Arabia

PROJECTS

Wasi – Integrated Student Transportation & Accommodation Platform

Graduation Project — 2025

Tech Stack: Flutter, Dart, Spring Boot, Java, REST APIs, PostgreSQL, Git, Agile (Scrum)

- Implemented mobile application screens using Flutter based on system design and SRS documentation.
- Integrated Flutter front-end with backend RESTful APIs developed using Spring Boot.
- Contributed to booking and service workflows implementation.
- Worked with PostgreSQL database through API integration.
- Followed Agile methodology with sprint-based development.

iOS Mobile Application – Swift

Personal Project — 2026

- Independently developed a functional iOS application using Swift despite no prior experience in the language.
- Implemented core application logic and user interface components.
- Integrated local data storage for managing application data.
- Applied AI-assisted development and rapid prototyping techniques to accelerate learning.
- Successfully built and tested the application in iOS environment.

SKILLS

Programming Languages:: Java, Dart, Swift

Frameworks & Tools:: Flutter, Spring Boot, Git, GitHub

Concepts:: Object-Oriented Programming (OOP), REST APIs, Software Development Life Cycle (SDLC)

Database:: PostgreSQL, SQL

Backend & Services:: Firebase
